## Section II - Composition/Ingredients

The identity of individual components of this mixture is proprietary information and is regarded to be a trade secret. However, based on hazard determination of contained ingredients present at a concentration greater than one percent, this mixture presents the following hazards:

**NFPA Rating System** (Scale 0-4 where 4=high degree of hazard):

Health=1, Flammability=3, Reactivity=0

## Section III - Hazard Information

**Emergency Overview**

Physical State: Clear Liquid

Type of Hazard: Flammable Liquid

**Potential Health Effects**

Vapor may be irritating to eyes, nose, throat, and respiratory tract.

Prolonged ingestion at high levels may cause damage to the liver and reproductive system. It may also cause anesthesia, dizziness, drowsiness, headache, loss of muscle coordination, nausea, vomiting and mental confusion.

Breathing high concentrations of vapor may cause anesthesia, dizziness, drowsiness, headache, loss of muscle coordination, nausea/vomiting and mental confusion.

Prolonged ingestion at high levels may affect the reproductive process.

May be irritating to skin and eyes.

NO SUBSTANCE WITHIN THIS MIXTURE HAS BEEN LISTED BY NTP, IARC OR OSHA AS A CARCINOGEN OR POSSIBLE CARCINOGEN.

## Section IV - Emergency and First Aid Procedures

**INHALATION EXPOSURE:** Remove to fresh air environment. If irritation continues, contact a physician.

**EYE CONTACT:** Flush eyes with copious amounts of water for at least 15 minutes. If irritation continues, contact a physician.

**SKIN CONTACT:** Remove contaminated clothing. Wash affected area with copious amounts of water for at least 15 minutes.

If irritation continues, contact a physician.

**INGESTION:** Do not induce vomiting. Give copious amounts of water to dilute. If irritation continues, contact a physician.

## Section V - Fire Fighting Measures

**FLASH POINT:** 65°F

**EXTINGUISHING MEDIA:** Foam, carbon dioxide or dry chemical.

**UNUSUAL FIRE AND EXPLOSION HAZARDS:** Closed containers may build up pressure if exposed to heat (fire). Vapors from explosive mixtures with air and may travel to a source of ignition and flash back.

**HAZARDOUS COMBUSTION PRODUCTS:** Burning liberates carbon monoxide and carbon dioxide.

**FIRE FIGHTING PROCEDURES:** Use standard procedures and preferred extinguishing media as stated. Cool fire exposed containers with water spray.

---

#### Section VI - Spill Release & Waste Disposal Procedures

---

Contain spilled material. Avoid open flames or other sources of ignition. Avoid inhalation of vapors. In confined poorly ventilated areas use of NIOSH-approved respiratory protection may be required.

Cover with inert non-combustible absorbent material and remove to an approved disposal container. Dispose of in accordance with local, state and federal regulations.

---

#### Section VII - Storage and Handling

---

It is recommended that this material be stored in a cool, well-ventilated area.

NOTE: Health studies have shown that exposure to chemicals pose potential health risks which may vary from person to person. Therefore, exposure to liquids, vapors, mists, and/or fumes should be minimized.

---

#### Section VIII - Exposure Controls and Personal Protection

---

EYES: In general, the use of safety glasses is recommended. If the material is to be handled in a manner where splashing may occur, the use of splash goggles or face shield is recommended.

RESPIRATORY: In well ventilated areas, respiratory protection is not normally required. In confined, poorly ventilated areas the use of NIOSH-approved respiratory protection may be required.

EQUIPMENT & APPAREL: The use of chemical resistant gloves is recommended. Acceptable industrial hygienic practices should be maintained.

VENTILATION: Provide adequate ventilation. Use local exhaust fan if necessary.
